Dr. Jeffrey Runge
National Highway Traffic and Safety Administration
400 South St., S.W.
Washington, D.C. 20590

Dear Mr. Runge,

I am a physician who specializes in asthma care. I am very worried about all the pollution that we have. As you know, SUVs are a major source of pollution. The average SUV produces 125 tons of global warming emissions over its lifetime.

The Guardian is an SUV design that could save thousands of lives each year and saves on gas and is less of a polluter. Please back up your words with actions to make SUVs safer for families and the environment.

Sincerely,

Ronald H. Saff, M.D.
